

AI for Business: Transforming Data into Decisions

CATIM - 2024

Kelwin Fernandes

Why? Father, husband

How? Entrepreneur
Founder & CEO at NILG.AI

What? AI consultant
PhD in Machine Learning

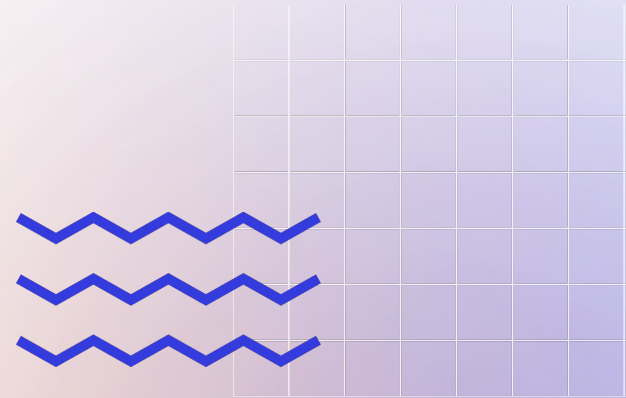

We are on a mission to become the
standard for AI adoption,
making any company highly efficient, ever-improving, and adaptable.

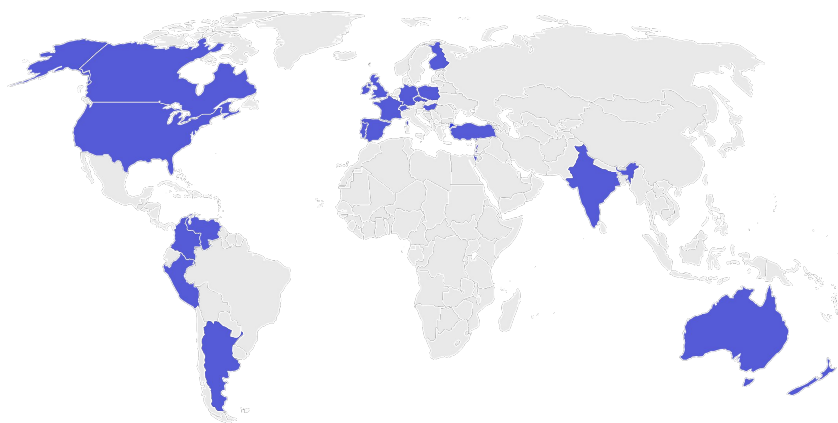

We help entrepreneurs and managers
to define and execute
solid AI roadmaps that drive
change by optimizing core decisions
in your business

Proven success across industries and markets

Trusted by companies of all sizes and industries

+100 Entrepreneurs
& managers

+25 industries

+20 countries

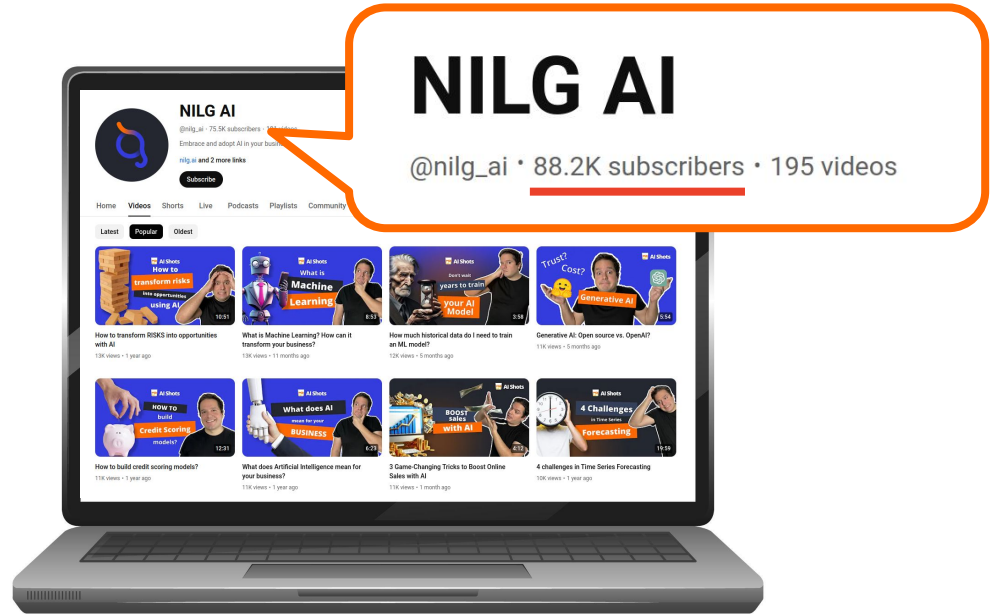

Becoming the largest B2B AI YouTube channel

Empowering you to make strategic AI decisions by yourself

Join the
+85k
subscribers
that trust NILG.AI

**What is
Artificial
Intelligence
?**

Artificial Intelligence is...

**Simple, useful and
actionable
definition for
business
managers**

ARTIFICIAL INTELLIGENCE

PREDICTIONS

PREDICTIONS

NEW DATA

NEW DATA

BETTER DECISIONS

**ARTIFICIAL
INTELLIGENCE**

PREDICTIONS

**NEW
DATA**

**BETTER
DECISIONS**

**I became a dad for
the second time 3
months ago**

I became a dad for the second time 3 months ago

I became a dad for the second time 3 months ago

Doctor

Boy? 1%

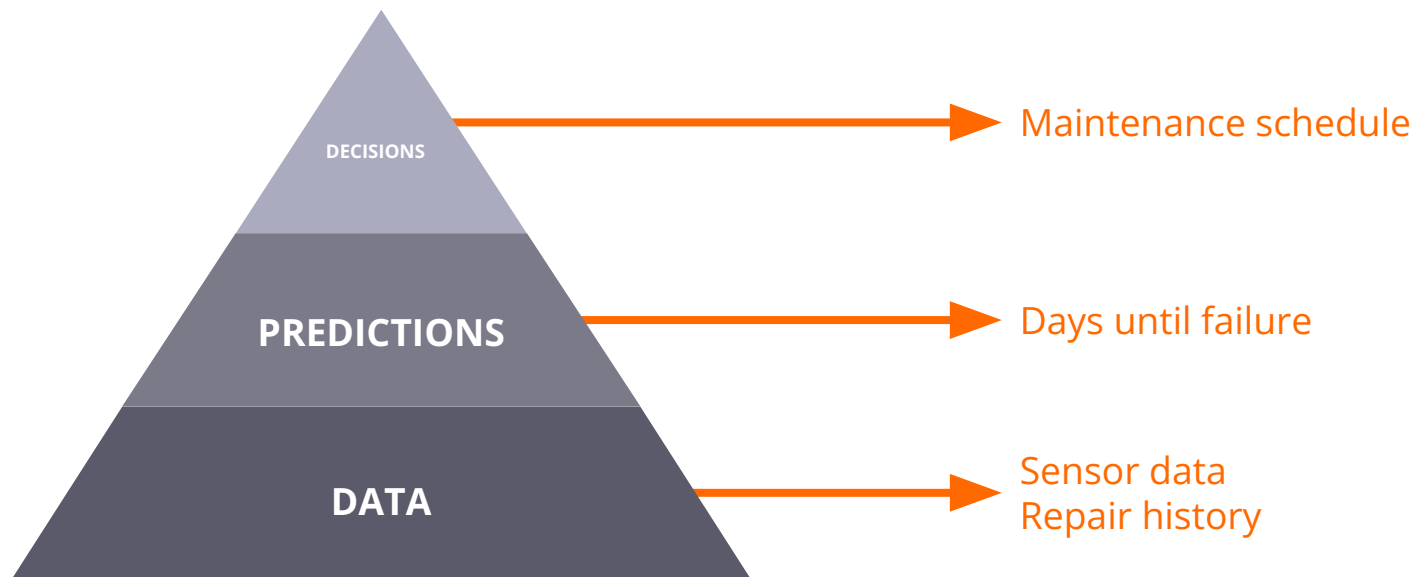

Girl? 99%

The Holy Trinity of Artificial Intelligence

Three key concepts to optimize any process

**Predictions are
TRASH**

**Decisions are
KING**

A futuristic industrial scene set against a dark, starry space background. In the center, a large, glowing blue globe is surrounded by a complex data visualization consisting of a circular grid and vertical lines. To the right, a factory with several tall smokestacks emitting white smoke is visible. The foreground and midground are filled with various industrial structures, including pipes, towers, and platforms. Scattered throughout the scene are several humanoid robots in blue and orange suits, some standing and some in motion. In the upper left and right corners, there are depictions of planets, including Saturn with its prominent rings. The overall atmosphere is one of advanced technology and industrial progress.

**What did GenAI
bring to the table?**

- **Same technology, same principles**
- **Democratization of access to AI**
 - We need less data
 - We need less skills
 - We need less local computing power

Large corps

SMEs

Individuals

Before GenAI

After GenAI

**How can you
leverage AI
in your business?**
(and daily routines)

How can you leverage AI in your daily routine?

Where to apply AI

**Make better
decisions**

**Automate
complex tasks**

Uncertainty
(tolerance to errors)
+
Scale
+
**Dynamic
environments**

How can you leverage AI in your daily routine?

What can you expect

+ Productivity

Producing more with the same resources

You know what to do,
but you need more of it

+ Efficiency

Producing the same with less resources

You know what to do,
but you need to do it faster

+ Effectiveness

Producing better outcomes

You don't know what to do

AI applications in the metalworking industry

AI applications in the metalworking industry

Just a few examples

**Predictive
Maintenance**

**Quality
Control**

**Supply Chain
Management**

**Inventory
Management**

**Customer
Relationship
Management**

Let's think about: Data \Rightarrow Predictions \Rightarrow Decisions

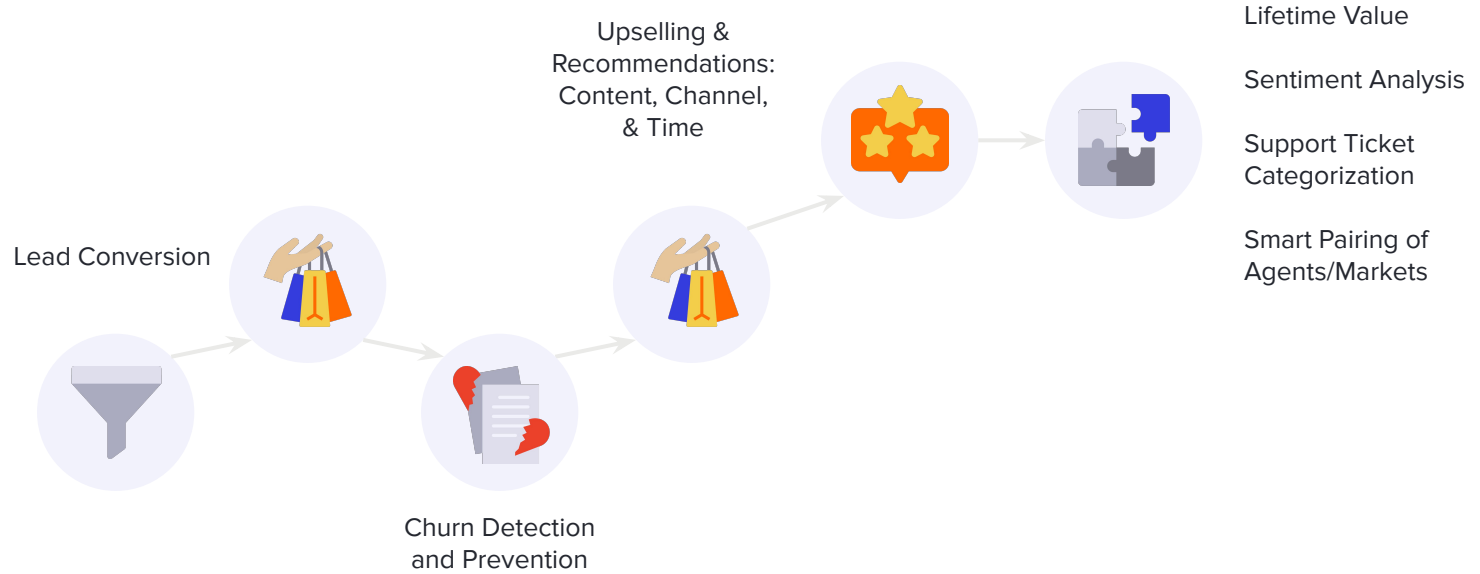

Applications in other industries we've worked on

Marketing & CRM

Proactive Customer Journey

Healthcare

Medical Decision Support & Hospital Management

Sample
Quality
Assessment

Compliance
Detection

Hospital
Management

**Procedure
centric**

**Patient
centric**

Cervical
cancer

Respiratory
issues

Others

Financial Services

FinTech, RegTech, and related services

Credit scoring

Automated assessment of loan submissions

Default Prediction

Detect abnormal consumption and future non-paying customers

Entity Categorization

Categorize transactions, companies, and invoices

Forecasting

Forecast core market indicators in your industry

Compliance

Continuous compliance assessment with current regulations

Fraud detection

Detect fraud and free-riders. Application in utilities and market research

Other Industries

Automotive, travel, retail, among others

Market Demand

Allocate products to markets based on predicted demand

Dynamic Pricing

Identify price elasticity and expected demand (travel, retail, etc.)

Quality Assurance

Defect detection on manufacturing and inspection (solar panels, 3D printing)

Predictive Maintenance

Identify system failures proactively based on sensor and image data

Multimedia video Analysis

Recognizing objects and events on video streams

Product Design

Discover product configurations that match expected benchmarks

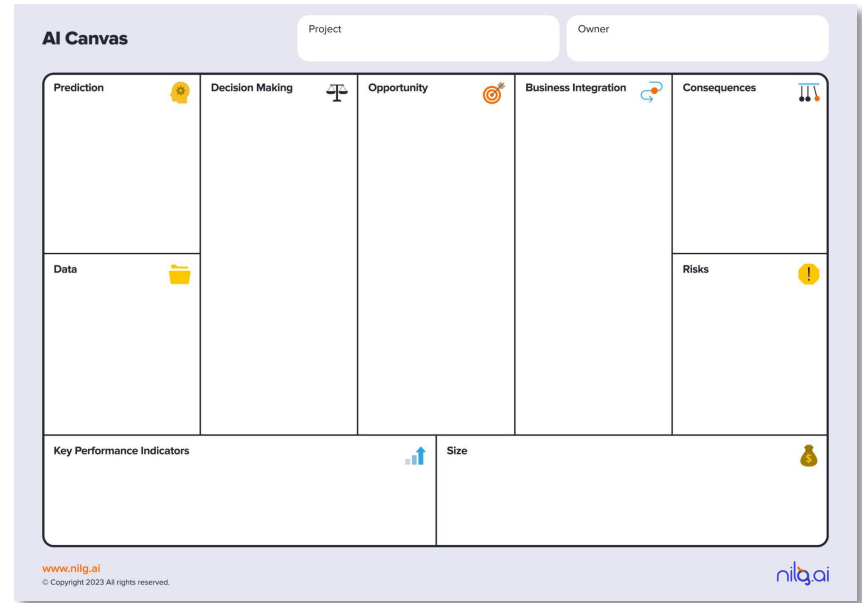

Business Centric AI

Business-centric AI: The AI Canvas

- **Universal language to talk about AI**

<https://forms.nilg.ai/event-pt>

NetApp is the

INTELLIGENT DATA INFRASTRUCTURE COMPANY

HI,
WE'RE
NETAPP

Across several eras in the age of data, NetApp has led in data infrastructure innovation

Increasing amount of data, complexity and cost

2002

Data Siloes & Unification

NetApp becomes the first vendor to **unify file & block workloads, and structured & unstructured data**

Hybrid Cloud

NetApp creates the first **data fabric strategy** that eliminates silos & provides unified control across any environment

Hybrid Multiclouds

NetApp becomes the **ONLY** vendor to introduce **cloud ops and data services** as key data infrastructure pillars in addition to being the **only vendor natively embedded in all major clouds**

Today

Intelligence

NetApp delivers **silos-free infrastructure**, then harnesses **observability and AI** to enable best data management everywhere

The Artificial Intelligence opportunity

AI is not only transforming industries but also shaping the future of work, the economy, and society at large

50%

Enterprise AI initiatives will boost productivity and creative problem-solving by 50%.*

Automation and Efficiency Improvements

60%

60% of workers will use their own AI to perform their tasks.*

Data Analysis and Insights

3YRS

Due to AI, the global average customer experience will improve for the first time in three years.*

Innovation and New Product Development

*Forrester 2024 predictions

AI Has Captured Business Attention (and Budget)

\$1.8T

Generative AI market size by 2030

9 in 10

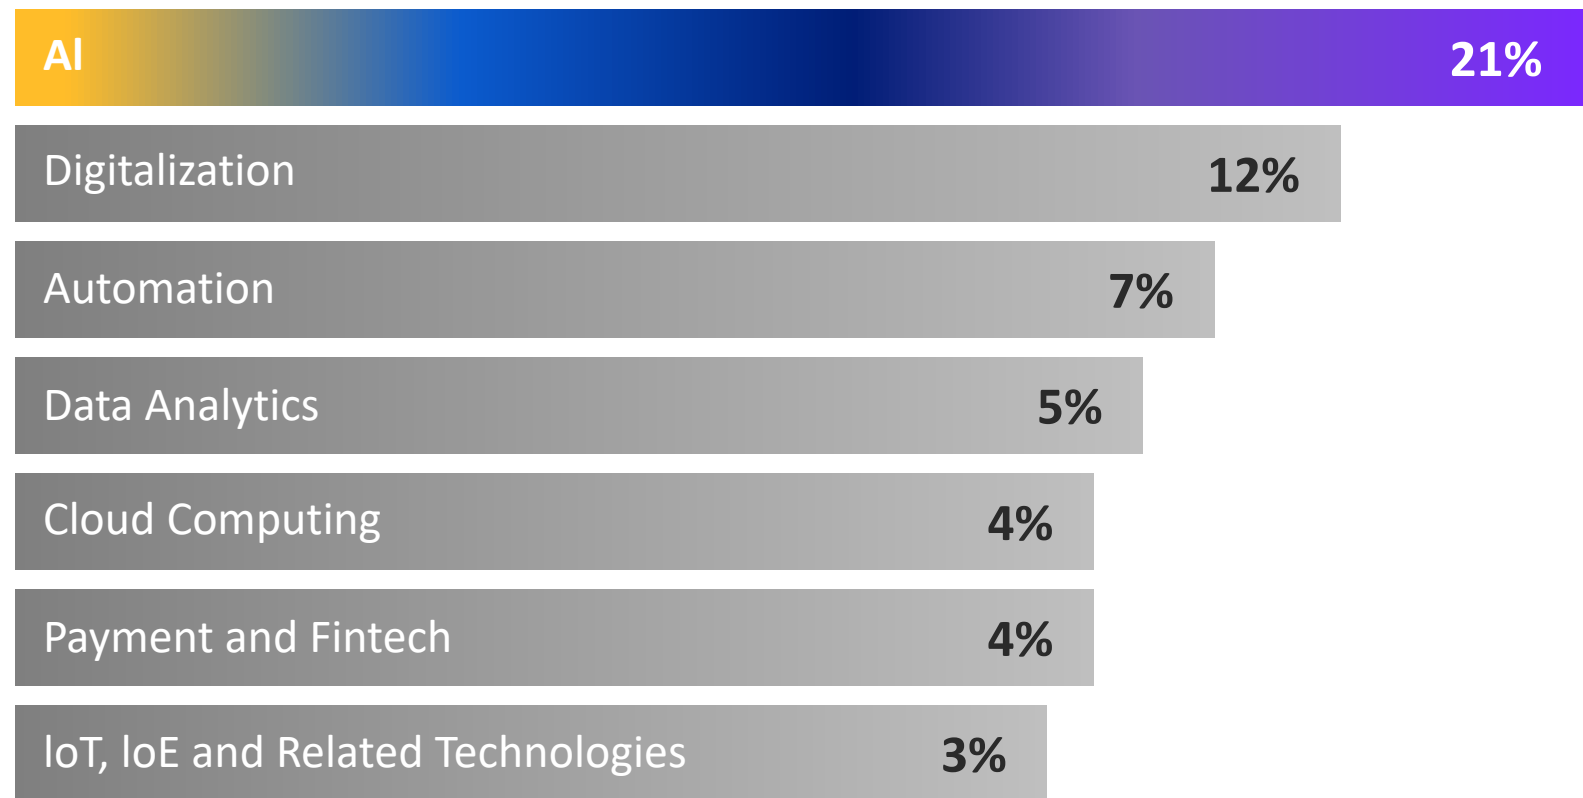

Organizations believe AI gives them a competitive advantage

2/3 occupations

could be partially automated by AI

Goldman Sachs

CEOs believe AI will most significantly impact their industries over the next 3 years

AI rewards are substantial...

7X

companies that succeed at AI will be fastest-growing

([Forrester](#))

\$16 trillion

in business value by 2030

([PwC](#))

but success is elusive

76%

of execs acknowledge that they struggle to scale AI successfully

Only

18%

of companies have implemented multiple enterprise AI projects

([Deloitte](#), [PwC](#))

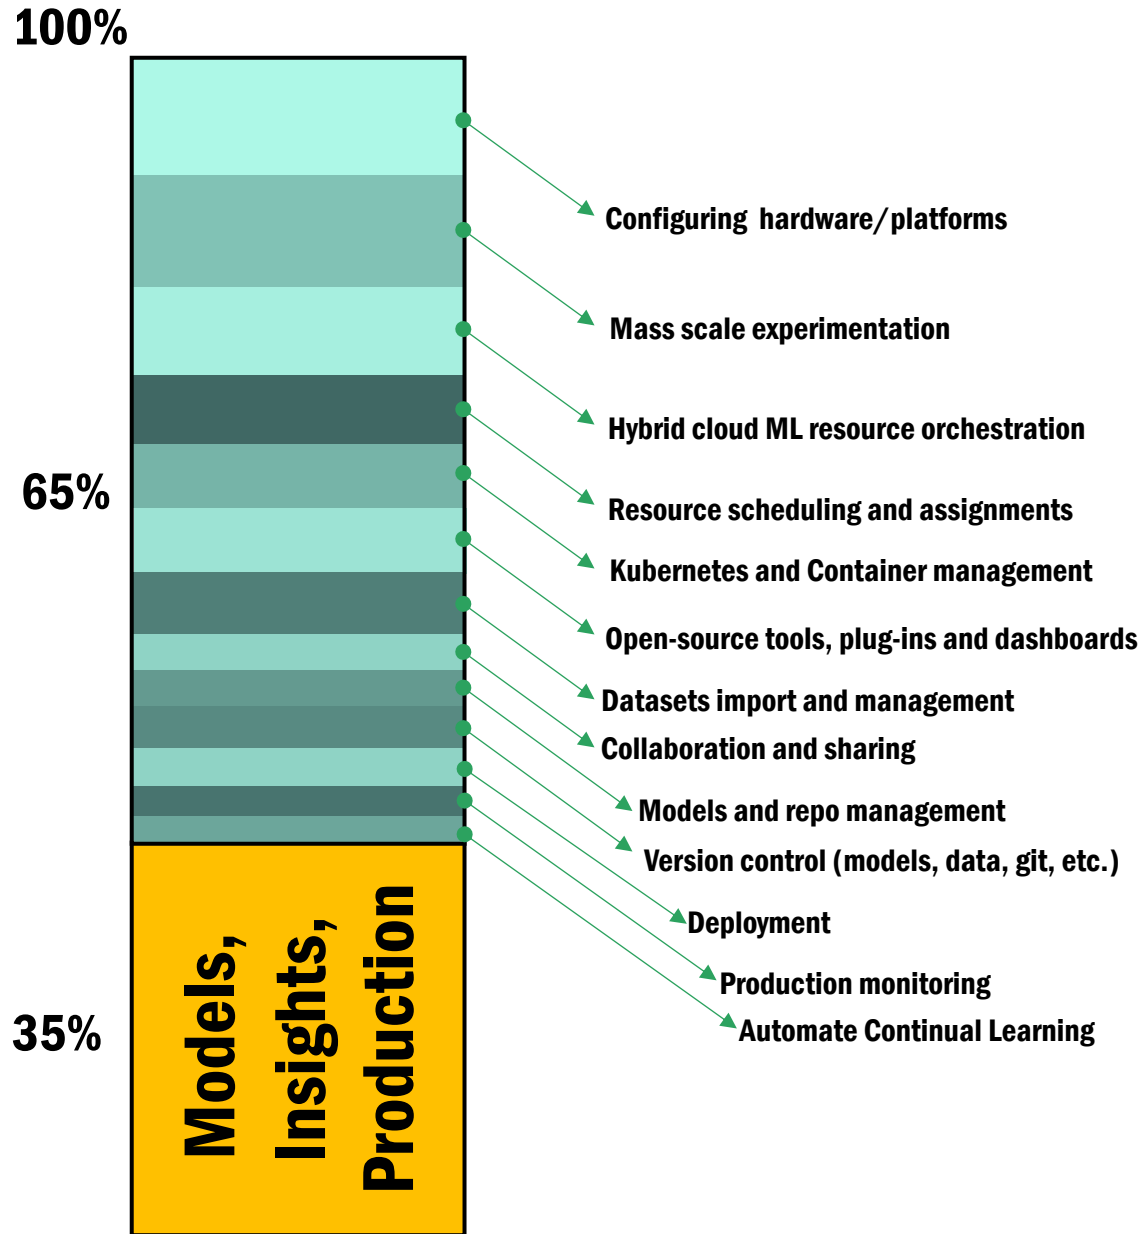

AI Industry Pain Points

Data Scientists are doing very little Data Science

Data Scientist Work Distribution*

Not Data Science Work

85%
OF MODELS DON'T GET TO PRODUCTION

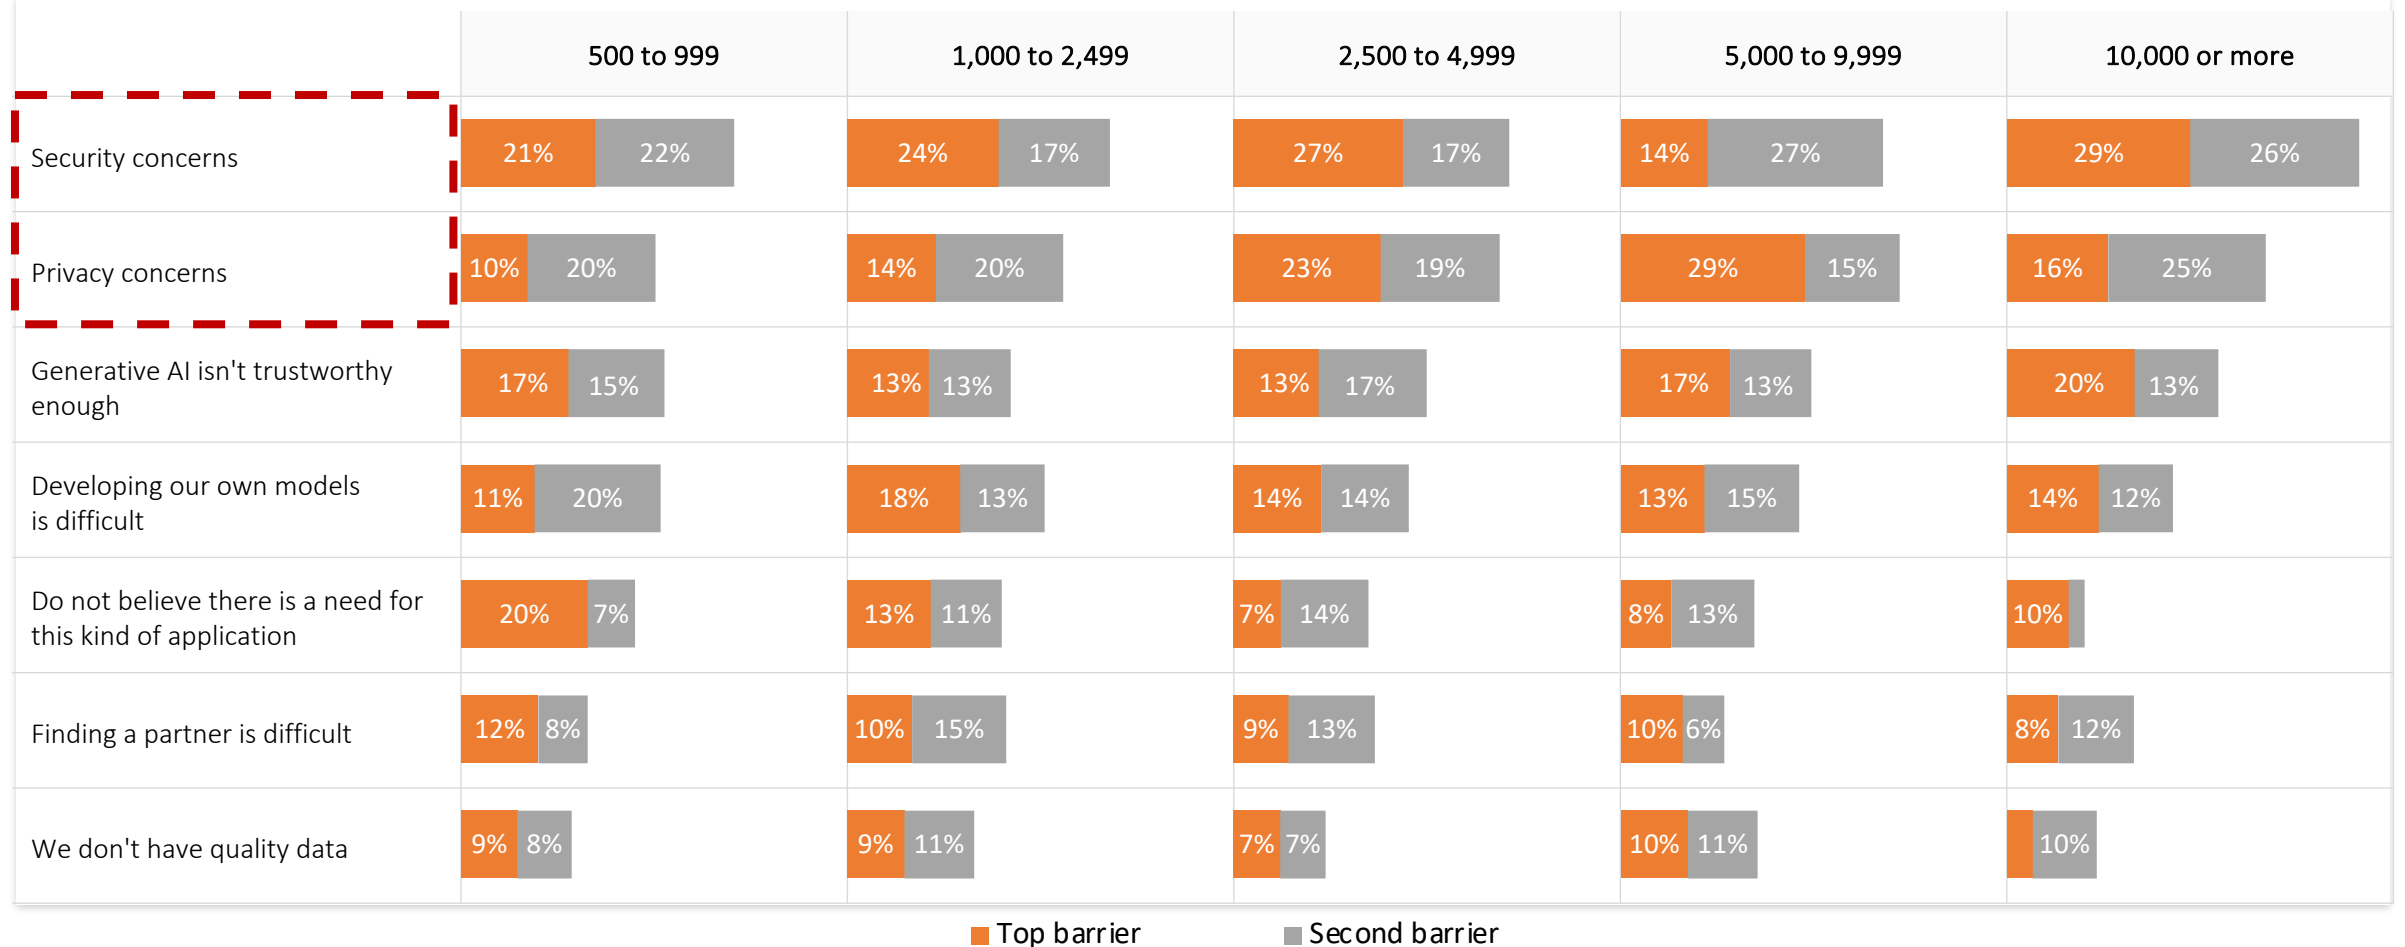

50%
OPEX WASTE

2X
SLOWER TIME TO MARKET

30%
REVENUES LOST

Top two barriers to using Generative AI in your organization by company size

What are the top two barriers to using Generative AI in your organization?Top vs. Second

Source: Future Enterprise Resiliency & Spending Survey Wave 6, IDC, July 2023, N=890, 500 to 999: 137; 1,000 to 2,499: 328; 2,500 to 4,999: 175; 5,000 to 9,999: 135; 10,000 or more: 115

SIMPLICITY AT SCALE

Artificial intelligence challenges demand... intelligent data infrastructure

**DATA IS
EVERYWHERE**

INTELLIGENT & INTEGRATED

**DATA CAN BE HELD BACK
BY SILOS OR BOTTLENECKS**

SCALABLE PERFORMANCE

**DATA IS CONSTANTLY
UNDER THREAT**

TRUSTED & SECURE

Intelligent data infrastructure turbocharges AI

Maximize the potential of AI and secure a competitive advantage with NetApp

DATA MANAGEMENT SIMPLICITY

Optimized data provisioning
Fast, efficient data cloning
Hybrid multi-cloud optimized

HIGHEST PERFORMING DATA

Accelerate performance
Eliminate data silos
Eliminate application silos

TRUSTED SECURE DATA

Model traceability
Built-in cybersecurity
Sensitive data detection

Customers See Business-Visible Results, and the Industry Has Noticed

Run 5x More data through your pipeline

<60 seconds Copy datasets in seconds rather than hours or days

~20 minutes To configure your AI infrastructure with Ansible integration

NetApp AI has won eight AI industry awards since 2019

A Leader in Gartner Magic Quadrant for Primary Storage Arrays

A Leader in Cloud File Systems

A Leader in Object Storage

A Leader in File-Based Storage

4 years of AI experience with 100s of published documents and 30+ dedicated AI team members

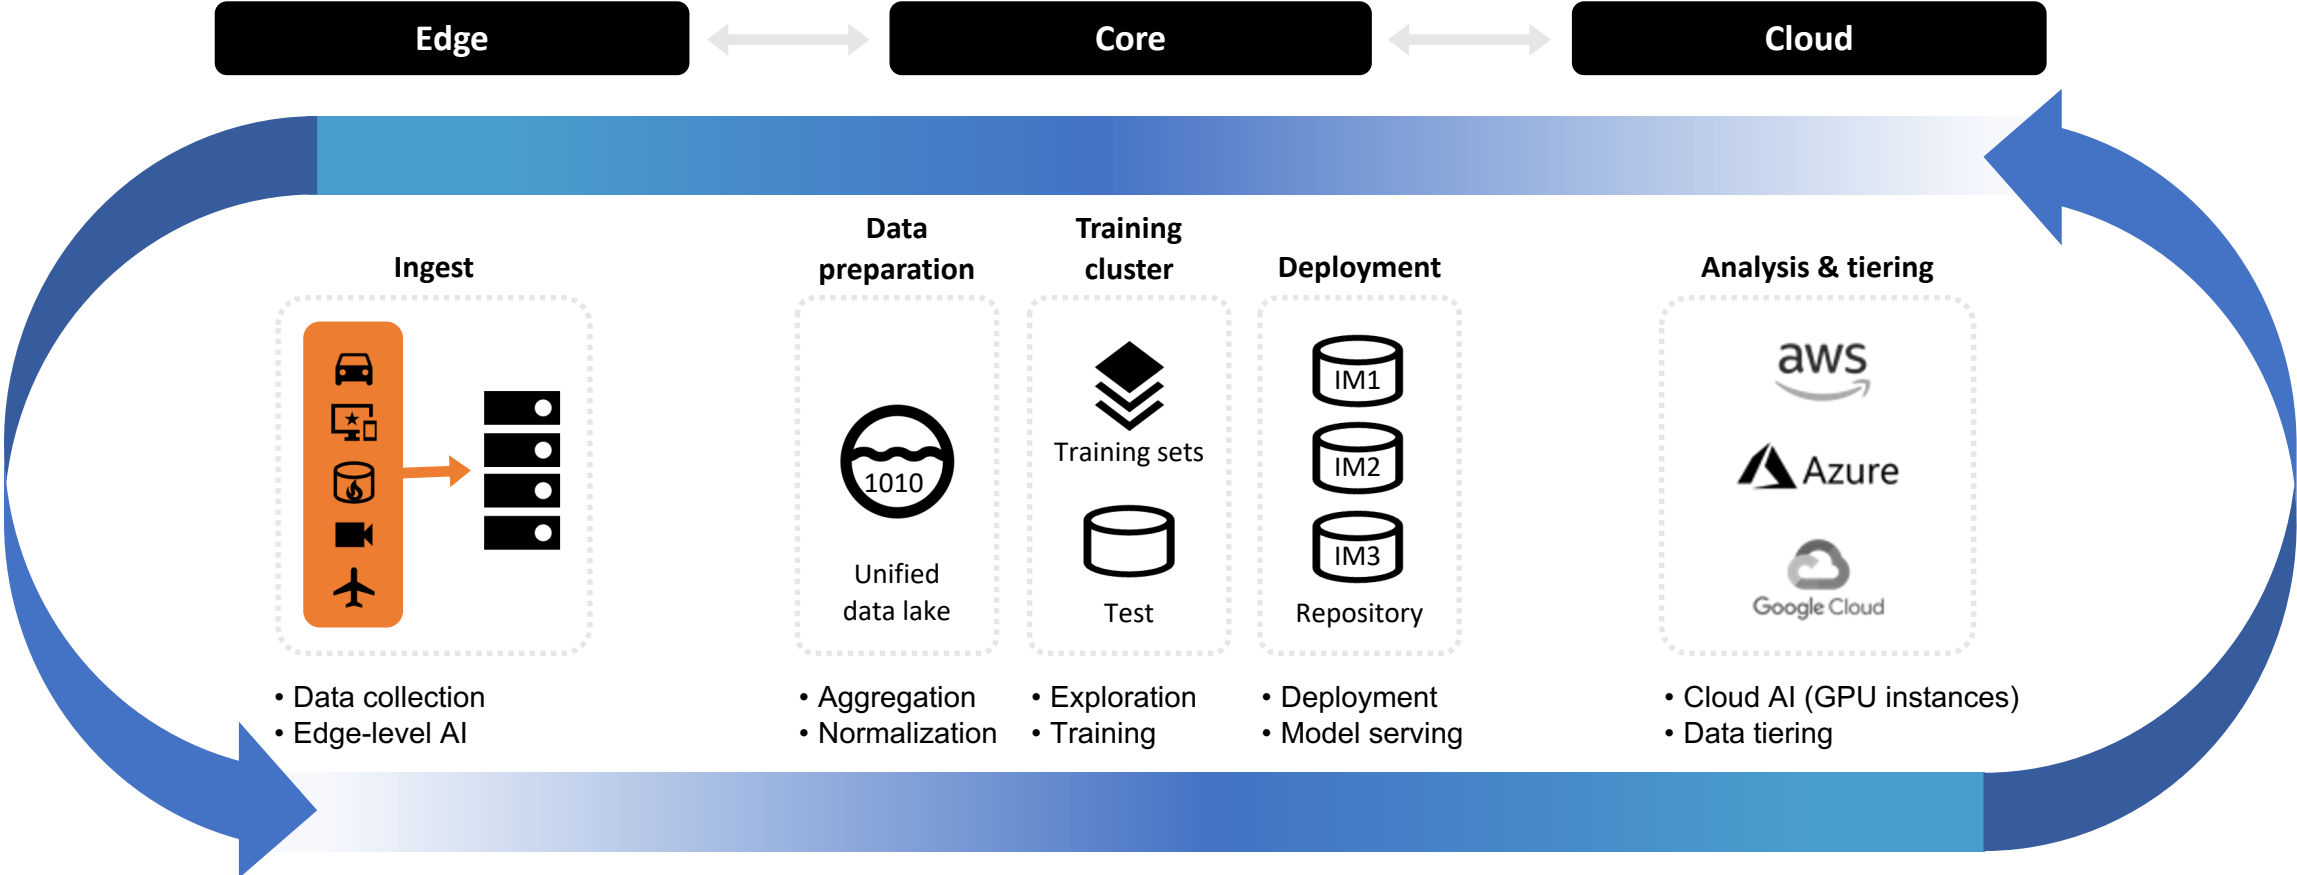

Top NVIDIA partner, 4 years of continuous development with NVIDIA

Over 400 worldwide customers

>50% YoY revenue growth

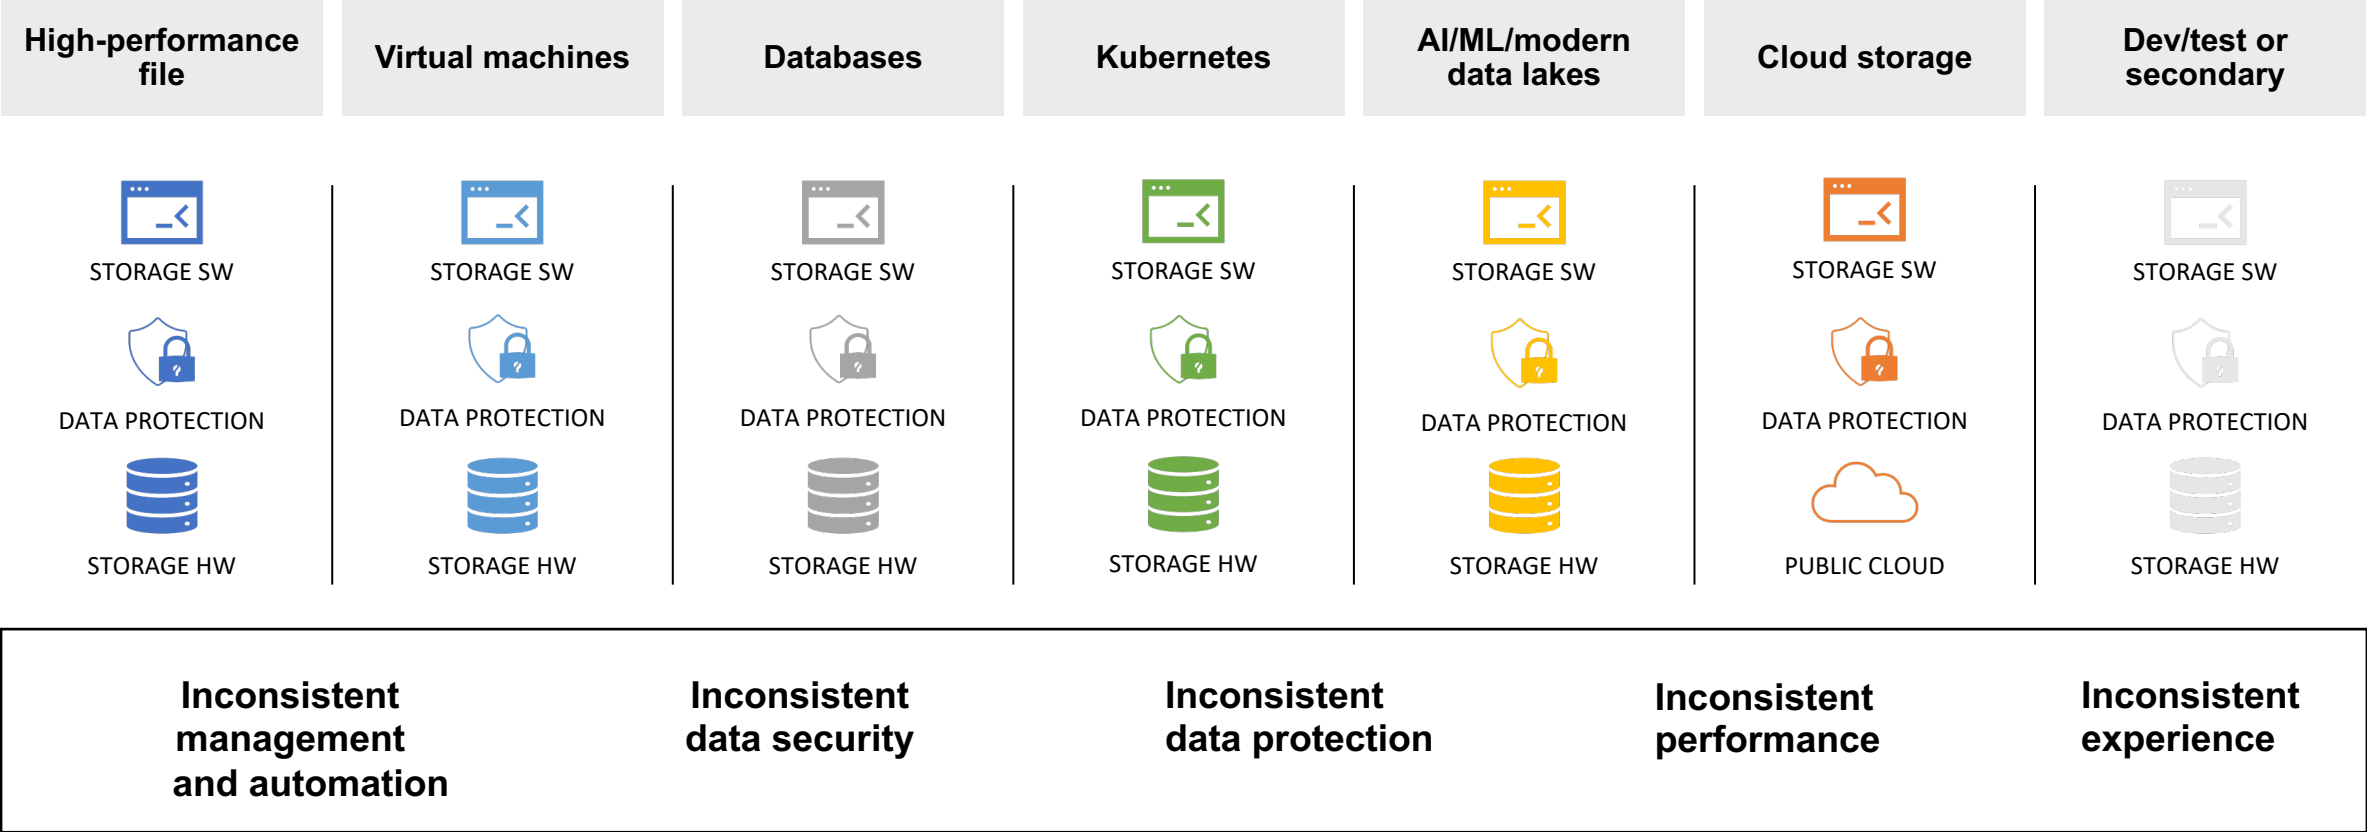

The best data for AI is data that moves freely

Build a data fabric that meets you where you are and where you want to be

Complexity is the silent killer of IT productivity

Bespoke infrastructure silos across app, data, cloud are inefficient, costly, and introduce risk

Increase productivity and minimize risk with unified simplicity at scale

Increase productivity and minimize risk with unified simplicity at scale

High-performance file

Virtual machines

Databases

Kubernetes

AI/ML/modern data lakes

Cloud storage

Dev/test or secondary

ONTAP

ONLY NETAPP

Comprehensive data management software delivering automation, efficiency, data protection, and security capabilities for file, block, and object

✓ Consistent management and automation

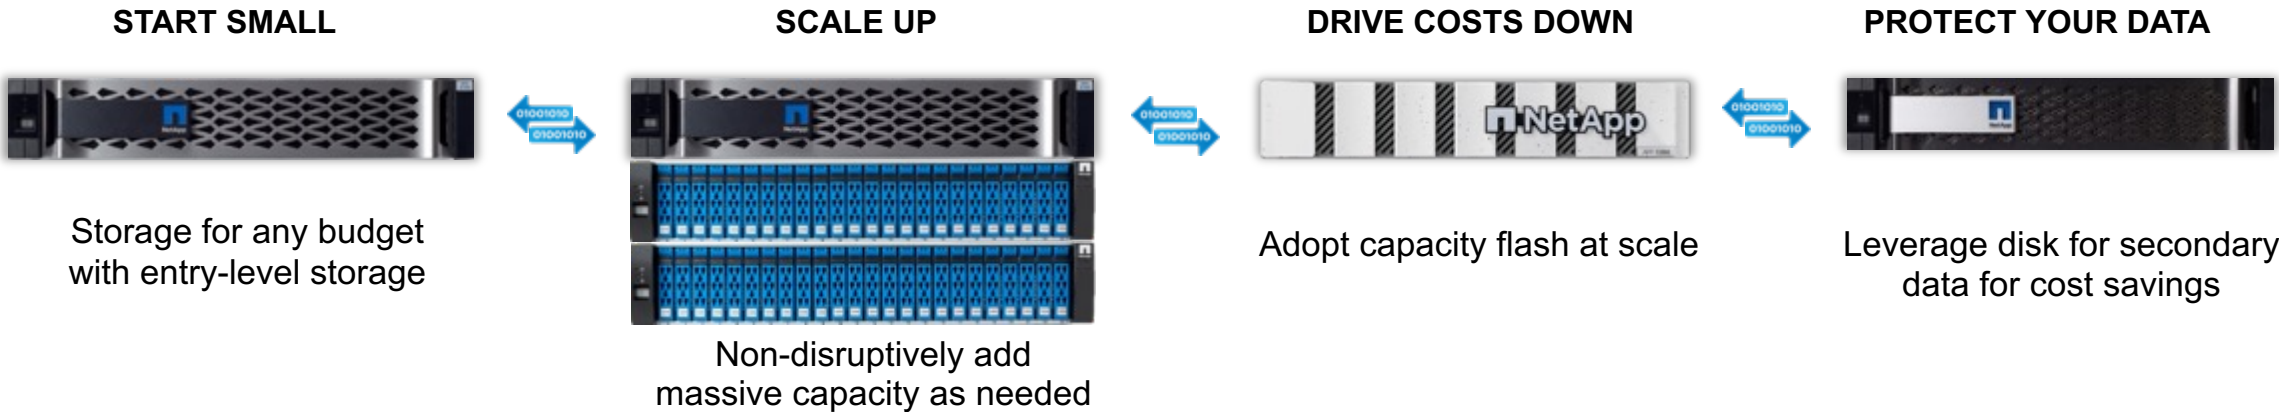

✓ Consistent data security

✓ Consistent data protection

✓ Consistent performance

✓ Consistent experience

Data storage that grows with your business

SCALE OUT: One unified cluster with non-disruptive data mobility

No bespoke infrastructure or data silos – just one simple data infrastructure powered by ONTAP

ONTAP Comprehensive data management software delivering automation, efficiency, data protection, and security capabilities for file, block, and object

On-premise icon, Cloud icon, **aws**, **Microsoft Azure**, **Google Cloud**, **IBM Cloud**

THE MOST SECURE STORAGE ON THE PLANET

NetApp secures and protects against today's top concerns

Integrated security is incorporated throughout the NetApp portfolio

Compromised administrator credentials—**multifactor authentication (MFA)**

Stolen data—**layered encryption**

Assured data retention—**write once, read many (WORM) storage**

Hacked software images—**secure boot**

Rogue administrators—**multi-admin verification and audit logging**

Ransomware attacks—**NetApp® Snapshot™ copies and integrations**

Lateral network attacks—**secure multitenancy (SMT)**

Disaster outages—**data replication**

Full-spectrum data protection built into ONTAP

Secure your data, recover from disaster, spot the attack, and thwart ransomware

PROTECT

Policy Engine

Automatically block known malicious file types

Immutable WORM Primary Data & Tamper-Proof Snapshots

Prevent data destruction with immutable and indelible snapshots

Multi-Admin Verify

Block rogue admins and malicious users

End-to-End Encryption

Secure data access, end-to-end

DETECT

Autonomous Ransomware Protection

Automatically detect and respond to file system anomalies that may signal a ransomware attack – **built into ONTAP**

RECOVER

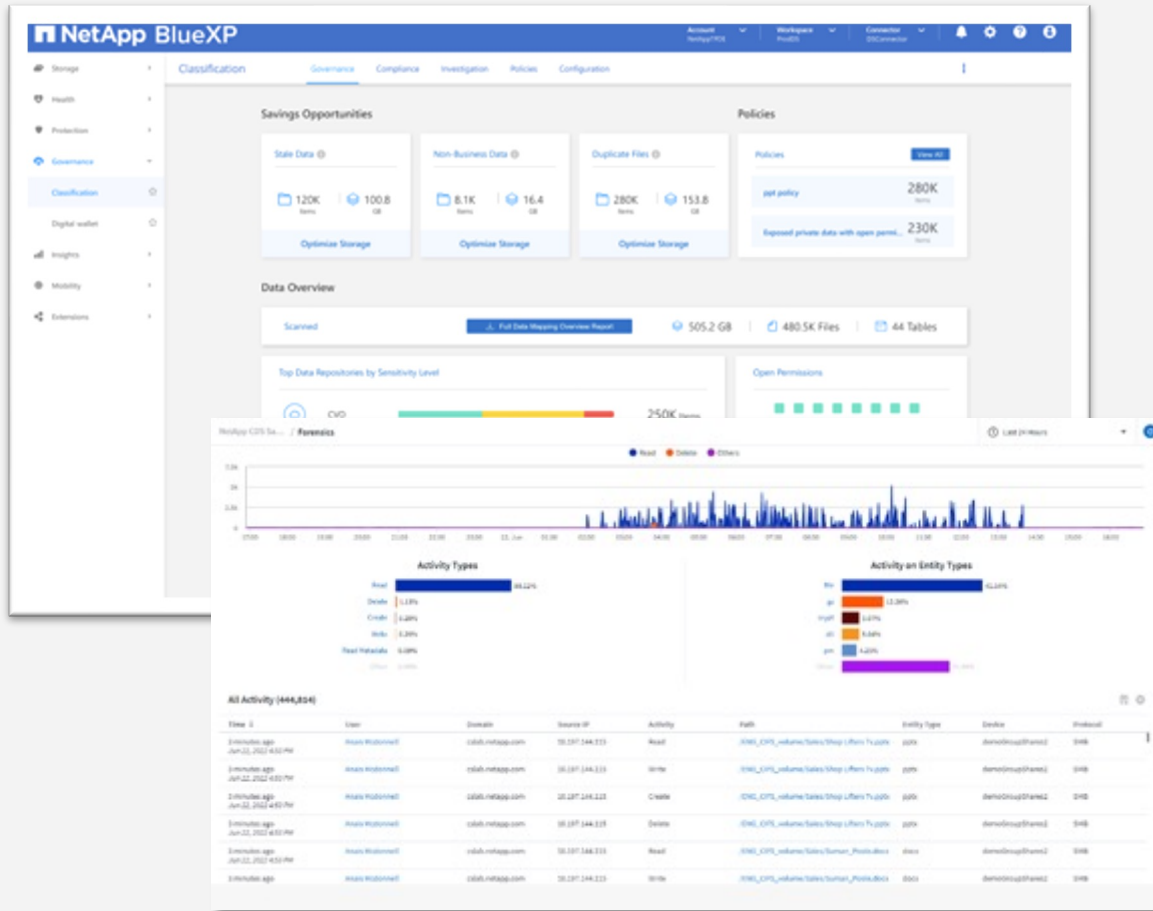

SnapRestore

Restore data in minutes from secure snapshots

Deep dive into your data with ease

Additional hybrid multicloud services to give you control over your data

NetApp BlueXP & Cloud Insights

Monitor for and alert on data access and **anomalous user behavior**

Get **file-level forensics** and system auditing.

Discover, classify, and categorize data and access across endpoints and clouds.

Locate **personal, sensitive, or regulated** data.

Pull **compliance reports** in minutes.

Some words from our lawyers... No ransomware detection or prevention system can completely guarantee safety from a ransomware attack. While it's possible an attack might go undetected, NetApp technology acts as an important additional layer of defense.

NetApp Ransomware Recovery Guarantee

For enterprise primary storage

NetApp will **warrant snapshot data recovery** in the event of a ransomware attack

If you can't recover your data copies with help from NetApp or partner assistance, NetApp will **offer compensation**

USE CASES & REAL RESULTS

Real Results with NetApp Data Solutions for AI

Data source: California Independent System Operator

Michelin Aircraft Tires provide bias tires, radial tires, and tubes for aviation customers around the world, in a range of applications including commercial and regional airlines, general aviation and military aviation

Customer Need

- Michelin is needing to improve their designs for airplane tires for creating higher quality tires to improve customer's experience; this research data must stay on premises given its competitive edge. This is Michelin's secret sauce, trade secret.

Technology

AI, Edge, Core and Data Lake

- 2 x AFF A300,
- 1 x SG6060,
- 1 x SG1000

Opportunity / Use Case

- Tire design and HPC simulation for testing the tires, and simulating wear
- At the Edge, tire wear and defect photographs are replicated to the Core for AI training
- Tire quality is improved through a closed loop system created for design, simulation, actual wear and defects

Solution

- Michelin needed a modern data infrastructure for HPC simulation, AI training & inference across the Core and Edge, and a modern data lake for maintaining all tire images and data

Customer Outcome

- Michelin expects to improve tire quality and life of tire, resulting in improved customer satisfaction

Yale New Haven Health System is a nonprofit healthcare system with headquarters in New Haven, Connecticut. It is Connecticut's largest healthcare system with 2,409 beds and includes hospitals, physicians and related health services throughout Connecticut as well as New York and Rhode Island

Customer Need

- Customer needed to support university researchers to accelerate healthcare research to improve clinical and patient outcome
- Customer wanted to quickly focus on COVID-19 research including hydroxychloroquine efficacy, and ID patients that are worst case scenarios
- Create a flexible and agile research environment for a wide range of topics

Technology

- StorageGRID, ONTAP AI, AI Control Plane, Data Science Toolkit, Trident
- Modern data lake built on StorageGRID provided a single shared location for all data
- Data extracted out of data lake could be moved into ONTAP for executing analytics and AI training

Opportunity / Use Case

- Customer needed to make existing data available for healthcare researchers but was hampered by Petabytes of data locked and siloed into Hadoop HDFS clusters
- Move research data into a modern data lake to create a flexible environment
- Data made available for analytics and AI training

Solution

- NetApp provided trusted advice to create a modern data lake design which would make data available to healthcare researchers across the university

Customer Outcome

- Mission was successful to improve health and health care through targeted research and evaluation projects that combine scholarship and service to have a positive impact on policy and people's lives

Johnson & Johnson is the world's largest health care company and remains at the top of the Big Pharma corporations with more than \$82 billion in annual revenue in 2020

Customer Need

- Build an AI/ML Center of Excellence to focus on drug discovery and geonomics
- Enterprise AI at Scale to accelerate time to innovation.
- Efficiency. Single environment to handle variety of workloads across multiple business units.
- Value. Investing in a trusted OEM partner for a fully supported solution.

Technology

- 5x AFF A800 systems
- NVIDIA DGXA100 + Mellanox IB
- AI Infrastructure that supports (SuperCluster):
- Hundreds of concurrent jobs + occasional full cluster single job
- Requires NFS + PFS (BeeGFS)
- Aligns with US Army and Eli Lilly requirements

Opportunity / Use Case

- NLP and geonomics
- NLP is used to improve drug discovery by improving the efficiency performing various tasks such as analyzing data and conducting interviews.

Solution

- Initially presented DGX Foundry with Keystone
- Customer decided on on-premises solution, ONTAP AI
- J&J relied heavily on NetApp expertise and guidance as they build their HPC/AI CoE

Customer Outcome

- J&J has a wide variety of HPC and AIML workloads: NLP, biomedical imaging, Gaussian, MATLAB, etc.
- The NetApp, NVIDIA. Partner Teams partnership was critical

Who is NetApp?

THE INTELLIGENT DATA INFRASTRUCTURE COMPANY

Industry-leading data storage, data services, and CloudOps solutions

Founded in 1992, headquartered in
San Jose, California

ANÁLISE DE DADOS NAS EMPRESAS: ATUALIDADE E FUTURO

Análise de dados nas empresas: atualidade e futuro

Atualidade

- **O tempo é um recurso escasso e dispendioso**
- **É necessário tomar ações / decisões rapidamente**
- **Conhecer e antever as situações, evitar desperdícios, paragens, erros, acidentes. Resolver problemas e adversidades**
- **Urgente olhar para o presente e projetar o futuro**

Análise de dados nas empresas: atualidade e futuro

- **Atualmente é possível resolver uma infinidade de problemas com recurso às tecnologias existentes**
- **São necessárias informações / dados para alimentar os sistemas, e assim obter o apoio na tomada de decisão**

Análise de dados nas empresas: atualidade e futuro

Dificuldades...

Uma das principais dificuldades prende-se com a quantidade de possíveis caminhos.

Não há uma melhor solução para um problema, tudo dependerá do contexto... e do objetivo a alcançar.

Análise de dados nas empresas: atualidade e futuro

Algoritmo de Regressão logística

Algoritmo de Regressão linear

Teorema de Bayes

Algoritmo da vizinhança mais próxima

Algoritmo de árvores de decisão

Algoritmo de clusterização

Análise de dados nas empresas: atualidade e futuro

Análise de dados nas empresas: atualidade e futuro

Na análise desta temática, questões se levantam:

- **Que informações / dados são necessários?**
- **Todos os dados que possuo são relevantes? São fidedignos?**
- **Como lido com o excesso de informação?**
- **Terei capacidade de tratar toda informação que possuo?**
- **Quais as melhores tecnologias para o meu caso?**
- **...**

Análise de dados nas empresas: atualidade e futuro

Quanto mais informações, maior é a probabilidade de indecisão, falha, má interpretação, perda a qualidade da informação recebida e, conseqüentemente, a tomada de uma decisão errada.

Análise de dados nas empresas: atualidade e futuro

Nas últimas semanas surgiram dezenas de notícias acerca do tema IA, ressaltam-se:

- “*Pela primeira vez, o ChatGPT passou no famoso teste de Turing*” – LiveScience (14/06/2024)

Os resultados revelaram que o GPT-4 foi considerado humano 54% das vezes, enquanto o GPT-3.5 obteve 50%. O humano verdadeiro foi corretamente identificado 67% das vezes.

Análise de dados nas empresas: atualidade e futuro

- *Cada vez mais pessoas estão a vender fotos da sua íris em troca de criptomoedas – mas a que custo? (Visão, 04/03/2024)*

Análise de dados nas empresas: atualidade e futuro

- *Regulamento Inteligência Artificial (IA)* - Regulamento aprovado pelo Parlamento Europeu em 13 de março de 2024 e aprovado pelo Conselho da UE em 21 de maio de 2024.

Aprovação da primeira regulamentação direcionada à IA. A aprovação ocorreu com **523 votos a favor, 46 contra e 49 abstenções.**

Análise de dados nas empresas: atualidade e futuro

O regulamento estabelece uma série de obrigações com base nos riscos potenciais e no seu nível de impacto, estabelecendo a **proibição de certas aplicações, limitações da utilização de sistemas de identificação biométrica pelas autoridades**, isenções aplicáveis à lei, obrigações para os sistemas de alto risco e requisitos de transparência.

Análise de dados nas empresas: atualidade e futuro

Inevitabilidade...

As alterações já iniciaram e encontram-se presentes no nosso dia-a-dia e mudaram o nosso modo de pensar e agir.

Exemplos:

- Aluguer de vídeos (Netflix, NOS tv, ...)
- Transporte de pessoas e encomendas (Uber, Cabify, Glovo, ...)
- Venda de bens e objetos de consumo em geral (Amazon, Ebay, ...)
- Aquisição de música (iTunes Store, Spotify, Beats, ...)
- Reservas de hotéis e estadias (Airbnb, Booking, ...)

Análise de dados nas empresas: atualidade e futuro

Inevitabilidade...

“Conhecimento é poder” – Francis Bacon, filósofo britânico (1561 – 1626)

Francis Bacon, em 1620, escreveu: “**knowledge and power are synonyms**”. Novum Organum, Livro I, #3. Advancement of Learning. Novum Organum. New Atlantis (Chicago: Encyclopedia Britannica, Inc, 1952), p. 107

Cada vez mais as empresas pretendem tomar decisões com base em informações e conhecimento em tempo real (tempo útil).

Dados... Voltamos ao início da apresentação...

Análise de dados nas empresas: atualidade e futuro

Potencial...

A **análise e tratamento de dados** permite:

- Otimização dos processos e assim redução de custos e aumentar a eficiência produtiva
- Melhoria da visualização e controlo dos processos de negócios (em toda cadeia de valor)
- Melhoria na qualidade dos produtos e serviços (controlo da qualidade em tempo real)
- Melhoria na sustentabilidade
- ...

Análise de dados nas empresas: atualidade e futuro

Desafios...

Porque **não avançamos**? O que nos **impede**? **R**: Devido a fatores de várias ordens:

- **Maturidade digital** das empresas (competências em análise de dados, departamentos vocacionados para análise e processamento de dados, hardware e tecnologias necessárias)
- **Obtenção de dados**
- **Cultura digital e recursos humanos** com formação e aptidão
- **Resistência à mudança**
- **Dificuldade em definir os benefícios económicos**, sobretudo a curto prazo, o que dificulta o investimento
- **Questões de segurança da informação** (cibersegurança) e **proteção de dados** (RGPD)

• ...

Análise de dados nas empresas: atualidade e futuro

Futuro...

“A digitalização não se expressa apenas na construção de uma página web ou do reforço do comércio eletrónico mas, nas fábricas, tem um papel fundamental na eficiência e otimização dos processos produtivos”

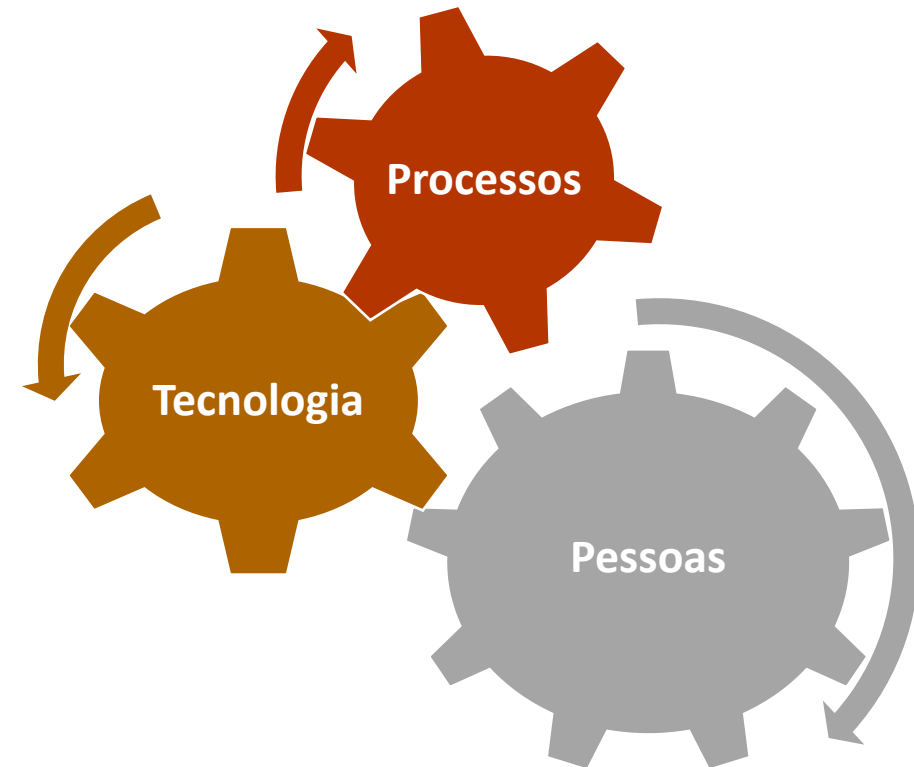

Ana Lehmann (Secretária de Estado da Indústria)

Análise de dados nas empresas: atualidade e futuro

Futuro...

Importante reter:

- Não basta adquirir sensores sofisticados, app's, softwares, hardwares, ...
- Indústria 5.0: A Indústria do Futuro terá como elemento central o ser humano. Daí a importância também na aposta do conhecimento, motivação, trabalho em equipa... as pessoas farão sempre a diferença.

Muito obrigada
claudia.pires@catim.pt
